# UNDERSADDLE PICKUP

## ELEMENT ACTIVE SYSTEM™

The patented one-size-fits-all Element reproduces impressive body sensitivity and articulation. It also has the greatest dynamic range of any undersaddle pickup available. The Element Active System features an all-discrete Class A endpin preamp and a soundhole-mounted volume control for easy access. Also included is our battery bag for secure battery retention.

### FEATURES

- All-discrete endpin preamp
- Pre-attached Element pickup
- Fits both 3/32" and 1/8" saddle slots
- Soundhole mounted volume control
- Battery type: Single 9V
- Battery life: 1,000 hrs

# MAGNETIC SOUNDHOLE PICKUPS

## M1 SERIES

The M1 is for players who love big acoustic tone with high feedback resistance on any stage. Combining the natural characteristics of your guitar's soundboard with a punchy string attack, the M1's body-sensitive design provides realism while cutting through a loud mix.

### M1™

Available in a completely passive design, the M1 provides professional amplification in minutes. Adjustable pole pieces give you perfect string-to-string balance for different types of strings and gauges. A built-in gold plated 1/8" jack makes removing the pickup a snap for when you are in the studio. The M1 includes a strapjack and 10' cable for absolutely no modifications to your prized acoustic.

# INTRODUCING LYRIC

## FEATURES

- TRU-MIC noise canceling technology
- No pickup
- Analog signal conditioning
- All discrete mic preamplifier
- Output jack electronics
- Soundhole volume control
- Mic presence control
- Quick & easy installation

# ACOUSTIC MICROPHONE

There's no argument that a mic is the best way to capture the sound of an acoustic guitar, but until now, using a mic for most live performances has been an elusive dream. Lyric, the next step in Tru-Mic technology, is the long overdue realization of this dream. Without a pickup, Lyric's microphone accurately transports your guitar's actual voice to a live audience for the most realistic and inspiring sound you will ever experience.

## TRU-MIC TECHNOLOGY

Our featherweight microphone, each high-graded for ideal response, mounts to the underside of the bridge plate with simple peel-&-stick adhesive to preserve the integrity of your instrument. The mic leverages the "pressure-zone" principle by positioning the capsule just 3mm from the surface of the top to hear the entire soundboard for even balance and tone. And the mic's proximity to the top allows high gain before feedback. Unlike other attempts to use an internal mic, Lyric employs noise canceling technology that rejects "boxy" reflections inside of the acoustic chamber. This patent pending minor miracle enables the mic to act as if it were outside of the guitar delivering a clear and open performance.

## ACOUSTIC MICROPHONE NYLON STRING

### LYRIC CLASSICAL

The Lyric Classical now pairs our groundbreaking TRU-MIC technology with a high-fidelity preamplifier specially crafted for nylon string guitars. Engineered for live performances, the Lyric Classical provides much of the same benefits as external mic'ing while achieving unprecedented feedback resistance and isolation for the stage.

### FEATURES

- TRU-MIC noise canceling technology
- No pickup
- Analog signal conditioning
- All discrete mic preamplifier
- Output jack electronics
- Soundhole volume control
- Mic presence control
- Quick & easy installation

## ANTHEM SL™

For those of you who prefer a minimalist approach to controls, we offer a streamlined version of the Anthem. In the Anthem SL, the balance between the TRU-MIC and Element pickup is pre-set for maximum mic so you can have the same groundbreaking fidelity as the Anthem in an endpin preamp format. A mic level trim control insures perfect balance for every installation. The preamp has our famous all-discrete studio quality circuitry and is outfitted with an easy to use soundhole mounted volume control.

### FEATURES

- Endpin preamp
- TRU-MIC
- Element pickup
- Mic level control
- Volume control
- Battery life: 170+ hrs, single 9V

ITEM : ANTHEMSL

£239.99 Recommended Retail

## ANTHEM SL CLASSICAL™

The Anthem is also available for nylon string guitars. With the same controls and format as the Anthem SL, the Anthem SL Classical's preamp is specifically tuned to capture the unique voice and dynamics of nylon string guitars.

### FEATURES

- Endpin preamp
- TRU-MIC
- Element pickup
- Mic level control
- Volume control
- Battery life: 170+ hrs, single 9V

## ANTHEM™

TRU·MIC TECHNOLOGY

### BRING YOUR STUDIO SOUND TO THE STAGE

For decades acoustic guitarists have dreamed of bringing studio sound to any live performance. After 30 years of effort, we achieved this dream and have done what no other pickup manufacturer has been capable of – combining studio mic fidelity with the freedom of a pickup.

*"I have only dreamed that someday technology would allow this quality of sound outside the walls of my recording studio." – Louis Drapp / Recording Engineer*

### TRU·MIC TECHNOLOGY

Unlike previous internal mics, the patent-pending tru-mic handles the majority of the guitar's frequency response—well into the magic lower midrange to 250 Hz. The tru-mic also blocks the reflected sound waves inside of the guitar that are responsible for the notorious internal mic "honk" and behaves as if it were outside of the guitar in a studio. The capsule floats inside of the guitar, just 3mm from the underside of the top, delivering unprecedented feedback resistance. An Element undersaddle pickup is used to augment only the lowest frequencies. The crossover rolls the pickup off at 250 Hz, eliminating the quack common to all undersaddle pickups. Hear all of the detail, warmth and personality of your guitar as only a real mic is capable of, without a hint of quack or honk.

*"Just what you expect from a very good mic. Everything else simply vanishes beyond the horizon in comparison." – Laurie Williams / Luthier*

## ANTHEM™

The Anthem has all the essential tools in one complete system. The feather-weight preamp and controls of the Anthem include: volume, mix, phase, and multi-segment battery check. Blend between the mic augmented with low frequency support and full range Element pickup.

### FEATURES

- No-cut preamp/control unit
- Includes TRU-MIC and Element pickup
- Mix control for mic and pickup settings
- Phase inversion for minimizing feedback
- Master volume
- Mic level control
- Multi-segment battery check
- Battery life: 170hrs, single 9V
